EDUCATION

Federal University of Technology, Owerri.

Bachelor of Engineering: Electrical and Electronics Engineering

Imo, Nigeria

September 2016 - May 2023

University of Northampton.

Master of Science: Computing(Software Engineering)

Northampton, United Kingdom

September 2025 - Present

EXPERIENCE

Zimmerman B.V

Frontend Engineer

Remote, The Netherlands.

December 2023 – Present

- Integrated charts from Apache Echarts using D3.js to let users render charts dynamically from datasets uploaded to our platform.
- Converted Figma designs in to functional client applications with React.js and Typescript.
- Implemented OAuth on our client application using Auth0.
- Connected our client platforms to Strapi CMS to enable internationalization.
- Wrote end-to-end tests for our client platforms using Cypress to ensure functionality and prevent regression in development.
- Implemented caching on the server side using Redis and Loopback.js to improve the performance of the application.

Techsemester

Full-Stack Engineer

Remote, Nigeria. Part Time

February 2023 – November 2023

- Developed the frontend and backend application of a product [talnts.app](#) using React and Django, implementing user authentication using google authentication and password login.
- Implemented notifications on the application using Firebase cloud Messaging.
- Leveraged Recoil.js for a streamlined, scalable, and efficient state management system, enhancing the application's data flow.
- Deployed the backend applications' microservices on AWS EC2 utilizing Docker. Also set up CI/CD with GitHub Actions.

Alajo.

Full-Stack Engineer

Lagos, Nigeria

May 2022 – February 2023

- Developed a live location tracking map for company agents, utilizing Google Maps APIs and Firebase integration with the company's devices.
- Created an admin dashboard for efficient user and agent activity management and oversight within the company using React and Next.js.
- Incorporated interactive charts through React Chartjs within the admin dashboard to provide a visual representation of transactions and cash inflow, enhancing data visualization and analytics capabilities
- Incorporated SMS notifications in the applications, enhancing user confidence in transaction security.
- Introduced a USSD service, giving customers internet-independent access to our services, establishing a competitive advantage in our industry.

MyQuba

Full-Stack Engineer

Remote, Nigeria. Contract

January 2022 – May 2022

- Enhanced the frontend application by implementing server-side rendering with Next.js, significantly boosting performance and improving the application's SEO.
- Successfully deployed both the frontend and backend of the application on Ubuntu servers using Docker.

Duduzili

Backend Engineer

Remote, Nigeria. Contract

November 2021 – December 2021

- Collaborated closely with the backend team to develop and refine API endpoints for the web application using Django, effectively resolving any existing bugs.

- Introduced WebSocket on the server to facilitate real-time messaging within the chat application, as well as to enhance notification capabilities.

PROJECTS

[Rie Ticket](#) (React)

- A web application for purchasing event tickets.
- Simplified the ticket purchasing process for users by integrating Paystack as a means of payment for users to purchase tickets.

Billza (Django)

- A mobile application for bill and utility payments.
- Successfully integrated virtual bank accounts with [Monnify](#), enabling users to conveniently fund their accounts.
- Developed a flight booking system that allows users to book flights to various global airports while transacting in Naira currency using [Tiqwa](#).

SKILLS

- React.js, Next.js, Django, FastAPI, Nest.js, Python, Javascript, Typescript, Node.js, Git, MongoDB, PostgreSQL, SQLAlchemy, Tailwind CSS, ReduxToolkit, Recoil.js, StyledComponents, Sass, Docker, Github Actions, AWS, Teamwork.
